1	PA Comments from NPS				
2					
3	Number	Page of PA	Comment	Response	Disposition
4		1 N/A	PA has not resolved OIBC concern about phasing of the AIS	Contrary to the OIBC understanding, the law does not prohibit phasing of the AIS.	No change
5		2 Page 3	The adverse effects of some properties has not been documented.	The condition of the effects finding has been the same for two years. This is not an acceptable time for this discussion. There will be opportunity to address this once the PA is executed. In most cases, there is no identifiable effect, but the City agreed to accept the adverse effect to further the process. To bring this forward now is inappropriate. The City would support elimination of the resources for which there has been no definition of the adverse effect.	Will consider removal of resources for which the adverse effect is not defined.
6		3 Page 3	Makalapa Housing Districts	Makalapa Districts are not an issue. The districts are as they were defined and approved by SHPD and agreed to by the Navy. The two districts are of different eras, served different purposes (officers vs. enlisted), they are separated by a major public thoroughfare, and were found to be separate districts by people with the expertise to make such decisions. Hence, the definition of two districts. They are not related except in an internal Navy management document (ICRMP). They can still be managed as one if the Navy so decides, but they are not one district. The ICRMP is not a Section 106 document. This is a Section 106 process. Most important, there is no harm to either the Project or the historic resources to do what is proposed now.	no resolution needed
7		4 Page 1	Navy as signatory	The Navy did participate in the consultation process, albeit sparsely, and has been added at their request to reflect their role as a land owner responsible for federal lands affected by the Project. Their role has been added to the PA.	Navy added as signatory
